Viewed from a top-down perspective, each p

layer controls a "snake" with a fixed starting position. The "hea

d" of the snake continually moves forward, unable to stop, growing

ever longer. It must be steered left, right, up, and down to avoid hit

ting walls and the body of either snake.

The first known personal computer version of Snak

e, titled Worm, was programmed in 1978 by P. &

Trefonas from the USA on the TRS-80 computer, and publis

hed by CLOAD magazine in the same year. This was followed shortly after

wards with versions from the same author for the Commodore PET and Apple II comp

uters.
