

mde bet mundo dos esportes

In multiplayer games, in-game chat allows players to communicate with others in real time, making interactions seamless. The mode of communication can be text, voice, or video.

In-game chat is usually text- or voice-based. Players can type message or transmit their voices through the game and other people in the game can choose to read or hear it. In-game chat doesn't involve video. You won't be able to see the faces of the people you are chatting with.

What do I need to know about in-game chat? - Digital Citizenship
