&lt;p&gt;; later films chose to give him a crippling fear of water. This was due to the fact that in the original comic books, Thor was a God for Thunder with the ability to control lightning. However, in the 1960s, Marvel Comics decided to give Thor a more human-like character, and as a result, he was given a crippling fear of water. This was done to make him more relatable to the audience and to add a layer of vulnerability to his character. In the 2011 film "Thor", Chris Hemsworth's Thor is portrayed as a powerful God of Thunder, but he is also shown to have a deep-seated fear of water. This fear is a result of a traumatic experience in his youth, where he was nearly drowned. In the 2017 film "Thor: Ragnarok", Thor's fear of water is further explored, and it is revealed that he has a complex relationship with his father, Odin, and his own identity as a God. The film shows Thor's journey from a powerful warrior to a more vulnerable and self-aware individual, and his fear of water is a key element in this journey. In the 2022 film "Thor: Love and Thunder", Thor's fear of water is again a central theme, as he is forced to confront his deepest fears in order to save the world. The film shows Thor's growth as a character, and his ability to overcome his fears and become a more powerful and confident God. In conclusion, Thor's fear of water is a complex and multi-layered character trait that has been explored in various ways in the Marvel Cinematic Universe. It is a result of his traumatic past, his relationship with his father, and his journey towards self-discovery and growth. The fear of water is a key element in Thor's character, and it adds a layer of vulnerability and relatability to his otherwise powerful and god-like persona.
